BULLETIN NO. 2

March 27, 2013

## Vaccine Availability

***Poliovirus Vaccine Inactivated (IPOL®)***

Sanofi Pasteur has been on backorder with the prefilled Syringes since 2010. At this time, they have not released a date as to when this product may be available. The 5ml 10 dose multi-dose vial is available under 6505-00-000-3841. Once the multidose vial is opened, it is good until its expiration date as long as it is handled and stored properly.

### ***Typhoid Vi Polysaccharide Vaccine (TYPHIM®)***

Currently, Sanofi Pasteur does not have any available inventory. The due date for the Typhoid prefilled syringes is July 2013. The 20 dose vial is available under 6505-01-385-6328. Once the multi-dose vial is opened it, is good until its expiration date as long as it is handled and stored properly.

***Tetanus Toxoid Reduced Diphtheria and Acellular Pertussis Vaccine Adsorbed***

Both Tdap formulations Adacel® (Sanofi) and Boostrix® (GSK) are available in the single dose vials. The 10 pack prefilled syringes are on backorder with GSK, but they are available in a package of 5 prefilled syringes from Sanofi, under 6505-00-000-7993.

***Rabies Vaccine***

Both Imovax® (Sanofi) and Rabavert® (Novartis) are on allocation for post-exposure only. We have a limited amount of stock available of the Rabavert®, under 6505-01-456-8888.

SSC is constantly working to procure the products our valued customers require to fulfill their healthcare needs. Thanks to our business relationship with our vendors, we often can purchase product that may not be available in the general marketplace. If you have an urgent requirement for a specific vaccine, we ask that you provide a brief justification, and we'll work with our vendors to fill your critical need. Please contact Annette Quinones at [Annette.Quinones@psc.hhs.gov](mailto:Annette.Quinones@psc.hhs.gov) or 410-642-1386 for any questions on vaccine availability.

As always, we appreciate the opportunity to serve your medical supply needs.
