BULLETIN NO. 6

November 9, 2010

Our New Medical Supply Catalog Is Ready for Issue!

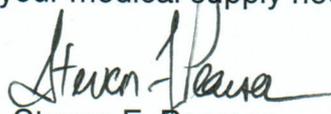

We will be shipping our latest edition of the Supply Service Center Catalog in late November, early December. We are very pleased with the new catalog, and hope our customers are as well. Our catalog is published every two years, with pricing updates occurring as timely as possible before the final release to the printer. Therefore, some of the pricing may have increased or decreased. We suggest that you utilize the published prices as a budgetary tool. For current pricing and availability, please access the SSC website at <http://sscweb.psc.gov>.

We continually strive to make our catalog as user friendly as possible. Included in our latest edition is a Drug Formulary (Appendix A), a Therapeutic Classification (Appendix B), numerous photographs of available products for easier identification, and a detailed point-of-contact listing.

To order a catalog, we ask that you visit our website and submit your request. You may also fax us your request, indicating your Agency, complete address, phone number and quantity of catalogs you desire to 410-642-2047.

As always, we would like to thank our valued and loyal customers for giving us the opportunity to serve you. With over 86 years of operation, our goal at the Supply Center is to continue to be your provider of choice for your medical supply needs.
